Skills

Software:

- Windows (used professionally)
- Linux- Ubuntu (Linux foundations certified, Operating Systems courses at WGU)

Frameworks:

- Node.js, Spring Boot (Java and C++ at WGU)
- Git (general use)

Languages:

- SQL, Python (used professionally)
- HTML, CSS, JavaScript (general use)
- Java, TypeScript, C++ (WGU)

Developer Tools:

- Teradata SQL, MYSQL (used professionally)
- Git, VS Code, VS Studio (general use)
- IntelliJ, Eclipse (WGU)

Projects

Emily-s Wagons (E-Commerce Application)

- A full-stack e-commerce application that was built using Java and HTML
- The backend includes a product repository, with controllers that validate when inventory is below minimum, above maximum, out of stock.
- The user interface is interactive fully combining the backend for a streamlined user experience. The owner can update inventory and add parts. The buyer can purchase a completed product and check out.

Predictive Weather Data AI-ML model

- The AI model uses Python and the Scikit-learn open-source machine learning library.
- The predictive weather machine learning model implements a decision tree regression algorithm on test data.

- The data is then optimized using a grid search and randomized search. The data is regularized using random forest and gradient boosting regressor and evaluated based on the mean squared error and R2 score.
- The optimized model's output can inform future predictions and model refinement in several ways. Using the gradient boosting model can support public health decisions, such as issuing health advisories or allocating resources to high-risk days
- *Results:*
 - o *Original Decision Tree -> RMSE: 0.6192, R-squared: -0.3646*
 - o *Random Forest -> RMSE: 0.3756, R-squared: 0.1724*
 - o *Gradient Boosting -> RMSE: 0.3504, R-squared: 0.2278*

Experience

Production Services, EDI Analyst I– Ace Hardware Corporation

October 2022 - June 2026

- Monitored scheduled batches in SAP.
- Using SAP generated purchase reports and IBM Sterling reports, I performed cross-validation to confirm that purchase order batches from SAP were sent successfully to the EDI Sterling Integrator.
- Created queries using Teradata SQL and analyzed reports for repeated errors. After analysis, repeat issues were resolved and analysis times were reduced.
- Performed scheduled AS2 and SSL certificate updates in IBM Sterling. Performed testing in QA and production for new AS2 and SFTP connections
- Developed test plans, test cases, test scripts, and data sets for developed applications and their integration into IBM PEM. End-to-end testing of EDI for inbound and outbound transactions
- Maintain onboard documentation, testing protocols, and partner communication standards
- Automated daily Excel tasks using VBA scripts. Identified opportunities to enhance EDI capabilities and reduce manual processes
- Provided support for 3rd party EDI providers and trading partners on any EDI-related issues. 3rd party providers, including but not limited to SPS commerce, ECGRID, True Commerce, OpenText, and Spring Systems. Communicate directly with Brand Partners to clarify issues and support long-term success

Sales Coordinator, Accounting Assistant -MISA Metals

March 2021- October 2022

- Advanced Microsoft Excel usage for data analytics and account reconciliation (XLOOKUP, VLOOKUP, Pivot tables).
- ETL - Downloaded data from SAP, cleaned data and loaded into the accounting system.
- Performed month-end closing and year end hard closing duties.
- Inventory/Payable/Ledger Reconciliation.
- Posted and created invoices in SAP, ensuring accurate, timely billing each week.
- Weekly accounts payable: processing payments via ACH, Wire Transfer, and checks.
- Created customer purchase and sales orders.

Office Assistant, Customer Service Representative – Republic Tobacco

August 2019-December 2020

- Excellent communication with customers regarding product issues, provided resolutions that led to greater customer satisfaction.
- Processed 70-80 purchase orders daily via EDI, phone and email, maintaining high accuracy.
- Provide invoices and process credits for returns.

Education

Western Governor's University – Bachelor of Science in Computer Science 2024-2026

Harper College – Associates of Science in Accounting 2018-2021

Certifications

Linux Foundations Certificate 2026

ITIL 4 Foundations of IT Service Management 2026
